Frontend Developer (React | JavaScript | Node.js | Firebase | GCP)

Professional Summary

Results-driven Full Stack Developer with over 7+ years of experience designing, developing, and maintaining scalable, responsive web applications. Proficient in modern frontend frameworks such as React and JavaScript, as well as backend technologies, API design, and database management. Experienced in building end-to-end solutions, integrating third-party services, and managing projects across the full development lifecycle. Passionate about delivering high-performance, user-centric applications with strong problem-solving skills and a continuous self-learning mindset. I have delivered exceptional full-stack solutions by integrating complex, business-critical features into production systems. This includes implementing Stripe payment workflows (subscriptions, one-time payments, and webhooks), building real-time updates using WebSockets, and consuming Streaming APIs for efficient live data handling. I designed push notification systems and a scalable email pipeline for transactional and automated messaging with high deliverability. I have also implemented AI-powered features using ChatGPT and OpenAI APIs, along with Vertex AI, and leveraged LangGraph APIs to orchestrate intelligent, stateful workflows. All solutions were built end-to-end with a strong emphasis on security, scalability, performance, and real-world production use.

Experience

Freelance – Fullstack Developer – [Location]

2018 – Present

- Develop and deploy web applications for international clients using React and Node.js.
- Collaborate directly with clients to translate business requirements into technical solutions.
- Implement responsive UI components and performance optimizations for a better user experience.

Tagline Infotech – React.js Developer – [Location]

2017 – 2018

- Built modular and scalable frontend components using React and Redux.

- Integrated RESTful APIs and implemented secure user authentication flows.
- Worked closely with backend developers to ensure smooth integration of frontend services.

RV Technolabs – Senior Frontend Developer – [Location]

2016 – 2017

- Led frontend development for multiple client projects using JavaScript and React.
- Worked on pixel-perfect UI implementations aligned with client design guidelines.
- Participated in sprint planning and code reviews to improve overall project quality.

Skills

Frontend: React, Vue, JavaScript (ES6+), TypeScript, HTML5, CSS3, jQuery, Bootstrap, Material UI

Backend: Node.js, Nest.js, Express.js

Databases: MySQL, MongoDB, Firebase, PostgreSQL

Tools & Platforms: Git, GitLab, Bitbucket, Azure, Postman, Swagger, Visual Studio Code, JIRA, Trello, Asana

Cloud: Google Cloud Platform (GCP), Firebase

Others: REST APIs, JSON, AJAX, Agile/Scrum

Education

MCA — SGVU University

2020 (8.00 / 10)

BCA — Sutex Bank College, Surat

2018 (8.20 / 10)

HSC — GSEB, Gujarat

2015 (84.53%)

SSC — GSEB, Gujarat

2013 (81.02%)

Projects

Bartleby (React, Postman, Swagger, Git)

- Led the frontend implementation for an online academic help platform. Designed UI, integrated APIs, and managed sprint planning.

Eyedog (React, Node.js, MongoDB, Loopback)

- Developed a human-centered indoor navigation system with a focus on accessibility and real-time map data.

BCE System (React, Postman, Swagger, Git)

- Built an e-learning application enabling teachers to create and assign lessons; implemented modular lesson components.

PromoPrep (React, Postman, Swagger, Git)

- Delivered a marketing collaboration tool with live notifications, calendar-based workflows, and file-sharing integration.

Insight Timer (React, Node, Swagger, Postman, Stripe, GCP, BigQuery, etc)

- Push notifications, Internal web app, and SASS product. Stripe marketplace APIs, Email Pipeline using Twilio and SendGrid.
